

TakeType Library

The TakeType Library was created from the results of the first and the second international Type Design Contest organized by Linotype-Hell in 1994 and 1997. Besides the prize winning designs, the collection includes additional fonts from the competition which are particularly impressive due to either their high level of quality, or their extreme originality. The spectrum of the TakeType Library ranges from text fonts through headline fonts to experimental designs. It also includes a series of pi fonts which, with their unique symbols, will most certainly have many admirers.
